# Training Delivery Methods

Veritas and Veritas Authorized Training Partners offer technical training that can be delivered live in the classroom or through a virtual environment.

## Virtual Instructor-Led Training (VILT)

Live, virtual training with a fixed duration including live lectures over webinar and remote access to hands-on labs

- Interaction with an expert instructor during webinars.
- Flexible lab hours during the week; students can work on labs during dedicated lab time or after hours.
- Does not require travel and associated expenses.

## Instructor-Led Training

Live, in-person training with a fixed duration held in a single classroom including live lectures and hands-on labs

- Interaction with an expert instructor
- Interaction with peers
- Focused, dedicated time away from the office/job

## The Veritas Learning Lab

Training designed for students who prefer a completely self-guided learning experience with a focus on hands-on lab activities.

- Learn at your own pace using the same materials as the instructor led options.
- Includes access to the lab environment for a full 6 months.

## Private, custom training

Training designed specifically for your team, when and where you need it.

- Training held at Veritas and Veritas Authorized Training Partner facilities that are designed specifically for technical classroom training
- Custom classes can be delivered for your environment and focused on your specific issues.

## NetBackup and Backup Exec-Related Certifications:

- Administration of Veritas NetBackup (Veritas Certified Specialist)
- Administration of NetBackup and Appliances (Veritas Certified Specialist)
- Administration of Backup Exec (Veritas Certified Specialist)
- Data Protection (Veritas Certified Professional)

# NetBackup and Backup Exec

View  
schedule

### NetBackup: Administration

Acquire the skills to make your data protection strategy successful. You will learn the general principles, configuration, and management of NetBackup, including how to: best utilize the NetBackup tools and interfaces, effectively monitor backup operations, and ensure data recovery objectives are met.

**5 day ILT/VILT; Veritas Learning Lab**

### NetBackup: Advanced Administration

This course covers advanced NetBackup topics, including NetBackup performance, disaster recovery, application backups on physical and virtual machines, virtual machine accelerator backups, and security. This course also covers using NetBackup to manage Oracle, Microsoft Exchange, Microsoft SQL, and Microsoft SharePoint database backups.

**5 day ILT/VILT; Veritas Learning Lab**

### NetBackup: Maintenance and Troubleshooting

This course covers general error detection tools and troubleshooting methodologies. Practice solving problems related to the NetBackup database, devices, media, disk, deduplication, and networking. In addition, students study the functions of key NetBackup processes and how to enable, view and manage the associated logs.

**4 day ILT/VILT; Veritas Learning Lab**

### NetBackup Appliances: Configuration and Management

This course covers how to configure and manage Veritas NetBackup appliances. You will learn about the general tools and processes used when working with NetBackup appliances, such as the NetBackup Appliance Shell Menu and the NetBackup Appliance Web Console, as well as configuration and maintenance tasks.

**3 day ILT/VILT; Veritas Learning Lab**

### Backup Exec: Administration

This course covers how to back up and restore data, configure storage devices, manage media, and maintain the Backup Exec environment. Students also learn how to configure and work with various Backup Exec Agents, which protect applications like Microsoft Exchange, Microsoft SharePoint, Microsoft SQL, and virtual environments.

**5 day ILT/VILT; Veritas Learning Lab**

### Flex Appliance: Administration

This course covers how to configure Flex appliances using containers. Students learn how to set up and work with the Flex Appliance. Students also learn how to modify settings, manage users, monitor, reconfigure the Flex appliance, and how to upgrade and rollback the Flex appliance.

**3 day ILT/VILT; Veritas Learning Lab**

### Enterprise Vault-Related Certifications:

- Administration of Veritas Enterprise Vault (Veritas Certified Specialist)
- Archiving and eDiscovery (Veritas Certified Professional)

# Enterprise Vault

[View schedule](#)

### Enterprise Vault: Administration

This course covers Enterprise Vault's functionality, operations and features. Additional topics include using reports, basic management, and an overview of Enterprise Vault backup and restore requirements. After you complete this course, you will know how to, manage, monitor, and maintain Enterprise Vault..

**5 day ILT/VILT; Veritas Learning Lab**

### Enterprise Vault: Implementation and Deployment

This course provides an overview of how to implement and configure a Veritas Enterprise Vault environment. This course is designed for technical support, sales engineers, partners, and customers tasked with implementing and deploying Enterprise Vault.

**4 day ILT/VILT (Onsite Only); Veritas Learning Lab**

### Legal Discovery Using Enterprise Vault Discovery Accelerator

This course is designed for those who use Discovery Accelerator to search, review, and prepare archived items in support of information requests. This class describes the steps involved in setting up discovery searches and explains how to review, analyze, and export the search results.

**3 day ILT/VILT; Veritas Learning Lab**

### Enterprise Vault Compliance Accelerator for Users

This course is designed for those who use or manage Compliance Accelerator to setup departments and sampling. In addition, this class describes how to review and mark e-mails, perform research by searching or copying items to a research folder and running reports.

**2 day ILT/VILT (Onsite Only); Veritas Learning Lab**

### eDiscovery-Related Certifications:

- eDiscovery Platform: For Administrators
- Archiving and eDiscovery (Veritas Certified Professional)

# Data Insight and eDiscovery

[View schedule](#)

## eDiscovery Platform: For Users

This course is designed for legal professionals that perform electronic discovery on electronically stored information. The course is designed to be delivered over three (3) days. It concentrates on the preservation, analysis, and production stages of the Electronic Discovery Reference Model (EDRM).

**3 day ILT/VILT; Veritas Learning Lab**

## eDiscovery Platform: For Administrators

This course is designed for legal professionals that perform electronic discovery on electronically stored information. The course focuses on the identification and collection of the Electronic Discovery Reference Model (EDRM), as well as, the installation, configuration and maintenance of eDiscovery. This class covers product functions and best practices for managing projects using eDiscovery Platform. It includes treatment of processing, search techniques, workflow management, export guidelines, and so on.

**2 day ILT/VILT; Veritas Learning Lab**

## Data Insight: Administration

This course is designed for the storage administration, IT security, and systems administration professional tasked with architecting, implementing, administering and using Veritas Data Insight. This class covers how to design, install, configure, administer and maintain Veritas Data Insight. Students will also learn how to use the core features of Data Insight to investigate risk, compliance and data Management use cases.

**4 day ILT/VILT; Veritas Learning Lab**

## InfoScale-Related Certifications:

- Administration of Veritas InfoScale Availability (Veritas Certified Specialist)
- Administration of Veritas InfoScale Storage (Veritas Certified Specialist)
- Storage Management and High Availability (Veritas Certified Professional)

# InfoScale

View  
schedule

### InfoScale Availability for UNIX/Linux: Administration

This class covers how to deploy InfoScale Availability in a UNIX/Linux environment.

**5 day ILT/VILT; Veritas Learning Lab**

### InfoScale Availability for UNIX/Linux: Advanced Administration I

This course is designed for the IT professional tasked with managing, configuring, and using clusters in an enterprise environment. This class covers how to set up advanced networking and fencing configurations, as well as disaster recovery solutions.

**5 day ILT/VILT (Onsite Only); Veritas Learning Lab**

### InfoScale Availability for UNIX/Linux: Advanced Administration II

This course is designed for the IT professional tasked with managing, configuring, and using clusters in an enterprise environment. This class covers how to set up advanced service group and application configurations, manage system outages, and upgrade a cluster.

**5 day ILT/VILT (Onsite Only); Veritas Learning Lab**

### InfoScale Storage for UNIX/Linux: Administration

This course covers how to use InfoScale Storage in a UNIX/Linux environment.

**5 day ILT/VILT; Veritas Learning Lab**

### InfoScale Storage for UNIX/Linux: Advanced Administration

This course discusses how to integrate, manage, operate, and utilize Veritas InfoScale Storage advanced features, which include Dynamic Multi-Pathing, Smart Tiering, Docker support, Performance Tuning, and Snapshots - in a UNIX environment.

**5 day ILT/VILT (Onsite Only); Veritas Learning Lab**

### InfoScale Storage for Windows: Administration

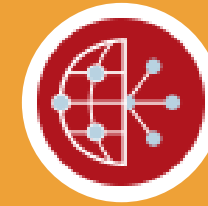

This course covers how to use InfoScale Storage in a Windows environment.

**2 day ILT/VILT (Onsite Only); Veritas Learning Lab**

### InfoScale Availability for Windows: Administration

This course covers how to use InfoScale Availability in a Windows environment.

**5 day ILT/VILT (Onsite Only); Veritas Learning Lab**

## Access Appliance: Administration

This course covers how to use Veritas Access Appliance to manage storage, file systems, and shares. You learn how to configure cloud-based storage as a secondary tier in Veritas Access, how to integrate Veritas Access as LTR storage for NetBackup, and how to integrate Access as Archiving and restoring of files for Enterprise Vault.

**4 day ILT/VILT; Veritas Learning Lab**

## Resiliency Platform: Administration

This course is designed for the IT professional tasked with installing, configuring, and maintaining Veritas Resiliency Platform in multiple Enterprise Data Centers. The course covers all aspects of deployment and implementation including product overview, architecture, installation, configuration, management and usage.

**5 day ILT/VILT; Veritas Learning Lab**

## Veritas Information Studio: Administration

Acquire the skills to organize your data, take informed actions, and handle security concerns, new regulations and continuous data growth. You will learn the general principles, deployment, configuration, and management of Information Studio, including how to best utilize its reporting capabilities, effectively manage and monitor data, and ensure data privacy, compliance, and optimize storage..

**3 day ILT/VILT; Veritas Learning Lab**
